FRENCH MANUFACTURER SINCE 1936
Centaure is located in Romilly-sur-Andelle (near Rouen) in Normandie since 1936. Each year, the company manufactures more than 700,000 products in two industrial sites of 10,000 m². Our products are designed for national and international markets.

QUALITY IS A TOP PRIORITY
Quality has always been a priority to Centaure, a responsible manufacturer. All departments of the company from the receiving to the sales are committed in a demanding certification process aiming for excellence even in detail. Furthermore, the respect of the environment is one of our most important purpose doing our job every day. The raw material Centaure is working the most with is aluminium which can be recycled indefinitely. To finish, one thing we watch with special care is waste processing.

INNOVATION AS A CORE VALUE
Constantly responsive to the users’ needs, Centaure places the Research and Development Department at the most important step of its strategy. The company designs and develops innovative solutions and high-performance products, adapted to the market’s evolutions and to the standards. The company makes sure that every new product can offer new features, usabilities and security to the final user.

1 group, 3 recognised brand, all resulting from a long industrial history and merging together their common values in order to offer you a complementary product range for DIY, the building industry and civil engineering.
CDH Group represent 360 co-workers daily committed to customer’s service and products’ innovation.

CDH Group

CDH Group
STANDARDS

Standards are national, European or international texts of reference which define the specifications for the design of the products and the minimum dimensions required, as well as result-based objectives.

EN 131 STANDARD

It is a European standard for ladders and stepladders. In France, compliance with this standard is mandatory pursuant to Decree 96-333.

A CLEAR DISTINCTION

between domestic products and professional use.

NEW QUALITY TESTS

RESISTANCE: Making sure that there is a clear distinction between domestic and professional products, tests are different in terms of requirement of security and weight that can be held:

• Domestic: 225 kg
• Professional: 270 kg

ADHESION: The adhesion tests are now completed on a glass panel. The shape and the material of our feet have been totally modified to achieve these new tests.

ENDURANCE: In position of use

• Domestic: 10,000 cycles
• Professional: 50,000 cycles

The French decree 2004-424 defines security rules to use equipments for temporary access use. It is now part of the French Labour Code.

LABELS

All labels are issued by independent national testing laboratories.

All the equipments in our catalogue that bear the label , present a maximum guarantee of security and quality. These labels ensure:

- a traceability
- a consistency of the products’ quality
- products withstand tough intensive use
- a compliance with French and European standards.

Our ladders are regularly checked by these institutions. Each year, the LNE conducts random samplings in stores and controls in the manufacturer’s production and quality processes.

Some of our products also follow other standards like the ones defined by the Warenwet in the Netherlands. Please ask for more information.

EUROPEAN RULES

By law, in every European country, the EN 131 standard is legitimized by a decree. In France it is the decree 96-333. Each decree respects the European norms and standards. They insure rules of security and good use for professionals: craftsmen, building professional, maintenance services, ...

The Netherlands have national decree going even further than the European standard. We do have some products reaching the Warenwet for the Netherlands. Please ask for more information.

Decrees impose to company directors the regular periodic review of the material.

Ladders and stepladders are means of access. They are not working stations (unlike scaffolding and working platforms). Beside simple access, they can be used only if:

• no product with guardrail can be used because of a technical issue (lack of space for example)
• the 3 following conditions are reunited all together:
  - the risk is low
  - the work will be quickly done
  - the work is not a repetitive action

For scaffolding the new European standard now requires that workers will never put themselves in a situation of risk of any kind at any moment. It means that a scaffolding have to be secured BEFORE accessing to the upper level by the installation of guardrails from the floor. The adjustment of the scaffold’s platform has to be possible without unsettling the operator.

ALL OUR PRODUCTS ARE DELIVERED WITH A USER MANUAL IN SEVERAL LANGUAGES

STANDARDS NF EN 131-7, NF P 93-353 and NF 9 93-352 concern the individual working platforms

STANDARD NF EN 1004-1 concerns the professional mobile scaffolds
BEFORE EACH USE

Check the presence of the instructions for use during the purchase. Check the ladder’s condition before each use:

- Stiles
- Rungs
- Junction parts
- Mechanisms
- Feet
- Ropes.

Always respect the instructions for use. Especially how properly positioning products and making adjustments.

ADVICE TO PLACE THE SECTIONS

LEANING LADDERS

REQUIRED POSITION

2- AND 3-SECTION COMBINATION LADDERS

WARRANTY

Our ladders, stepladders and derivatives are guaranteed against all manufacturing defects except for wearing parts; the guarantee is limited to the repair or replacement of any item found to be defective. Exclusions: all products modified without our consent, damages caused by improper use or products damaged during transit or handling.

The upper section is removable to be used as a single ladder (except 3x13 and 3x12).

KET3
3 x 8 rungs

KET2
2 x 8 rungs

Safe ball level to give the ladder the correct tilt.

Large non-slip rungs ribbed on 4 rungs.

Hinges in reinforced steel making the level compensation possible and providing increased durability.

Steel strengthening pieces placed in the splayed base’s rungs.

Socks anti-slip, anti-skid.

Stable Its design with splayed base absorbs the uneveness of the ground and helps to avoid obstacles.

Optimum grip thanks to its splayed base

Maximum loading capacity: 150 KG.

In stairs (possible adjustment 1 rung max)

Safety hooks in aluminium with locking device.

Delivered with showcard.

3-year warranty

EN 131 standard compliant with safe

Ball level to give the ladder the correct tilt.

### Hinges in steel
- Protected with epoxy
- Enveloping, riveted.

### Platform
- In ribbed steel painted with black epoxy paint
- Size 25 x 26 cm

### Aluminiun steps
- Firm crimped connections on the stiles
- Depth 80 mm

### Tool tray
- With many storage areas.

### Tested to 260 kg
- Tested carried out in working conditions, the 4 legs resting on a concrete floor with a load of 260 kg applied to the platform.

### Easy storage
- Stable when folded.

### Screwed-in feet
- Going into the profile, non-slip.
**PRO’UP // WITH HAND RAILS**

ERGONOMIC TOOLTRAY
more comfortable for the legs and big capacity.

ALUMINIUM STEPS
Firmly crimped on the stiles.

2 ALUMINIUM ACCESS HANDRAILS
equipped with ergonomic grips.

PRO’UP 5 STEPS

PAINTED FRONT STILES.

LARGE NON-SLIP SCREWED FEET FOR MORE GRIP.

**TESTED TO 260 KG**

Tested carried out in working conditions, the 4 legs resting on a concrete floor with a load of 260 kg applied to the platform.

**MAXIMUM LOADING CAPACITY 150 KG.**

*The structure «in aluminium tubes» is the result of a manufacturing technology patented by Centaure. This process consists in fixing the rungs on the scaffold’s stiles so as to lock it the system provides a greater resistance to the whole structure. The stile’s round shape is the most adequate in terms of resistance and stability. It is mostly use in the world of professional scaffolding.*

**RESISTANCE TESTED TO 300 KG**

**ALTER PRO**

// MAXIMUM WORKING HEIGHT: 5.0 M

- 4 SWIVEL CASTORS WITH BRAKE
  - Diameter 150 mm
- LARGE NON-SLIP PLATFORM
  - Equipped with trapdoor
- ALL-ALUMINUM STRUCTURE
- QUICK AND EASY ASSEMBLY DUE TO THE FOLDING MODULE

**EXTENSION // FOR ALTER PRO**

// MAXIMUM WORKING HEIGHT: 7.0 M

**PACKAGE CONTENTS:**
- 2 aluminium ladders
- 1 platform
- 4 rails + 2 aluminium diagonals
The products of the Master range are tough by design to meet the requirements of an intensive use. They cover the most common height access needs. Safe and high performance products, they match all the qualities required on building sites.

ALUMINIUM ROOF HOOK

FOR EASY ACCESS TO ROOF
Optimal safety thanks to 2 super wide extended tubes.

QUICK SET UP
Telescopic adjustment between the rungs with locking device. The hook is fixed on the 2 upper rungs of your wood roof ladder and is locked.
2 wheels with rubber stripping and the large leaning surface prevent from damaging the roof. Adapts on the flat roof ladders.

Item code | (L x W x D) (m) | (kg) |
---|---|---|
480001 | 0.99 x 0.48 x 0.55 | 4.60 |

During jobs on roof ladders, one must use anti-fall protection equipments.
ALUMINIUM ROOF LADDERS

SAFE ACCESS TO ANY TYPE OF ROOF with your aluminium roof ladder.

QUICK AND TOOL FREE ASSEMBLY.
1. Snap the roof hook on the required ladder length.
2. Turn the ladder and push it upward thanks to the 2 wheels with rubber stripping.
3. When you reach the roof top, turn the ladder 180°.
4. Aluminium roof ladder is ready for a safe use.

PACK 330 MM ALUMINIUM ROOF HOOK

COMFORTABLE USE!
Non-slip ribbed rungs elevated for more comfort to the feet and knees. Adapts to any roof tilt.

ULTRA RESISTANT!
Ultra-resistant stiles in extruded aluminium.

ADHERENT!
Protection from non-slip rubber profiles for incomparable adherence and the protection of the roof.

NO TOOLS, NO SCREWS!
The end of the profiles easily clip in another ladder because of their bevelled shape. A double security is ensured thanks to a first automatic lock and then a lock on each side of the profile of the ladder engaged by rotation.

PRO 54 // ALUMINIUM WITH CRIMPED STEPS

PRACTICAL!
- Very handy tool tray.
- Including graduated ruler and pail hook, for barrels of up to 30 kg.

ROBUST!
- Highly resistant hinge from cast aluminium covering the rear section.

STABLE!
- Large non-slip socks screwed to the feet: greater support on flat surfaces for maximum durability.

NON-SLIP WORKING PLATFORM
- in cast aluminium. Size 250 x 250 mm.

LARGE SECTION OF PROFILE
- 54 mm on the climbing section.

NO LIFT UP
- thanks to the shape of the platform.

STANDARD EN 131 COMPLIANT WITH 5-YEAR WARRANTY

Maximum Loading Capacity 150 kg.

Tested carried out in working conditions, the 4 legs resting on a concrete floor with a load of 260 kg applied to the platform.

EXPERT 54 // LACQUERED ALUMINIUM WITH CRIMPED STEPS

SAFE PLATFORM RAISING
HEIGHT 1500 MM

REGISTERED MODEL
Super resistant thanks to the hinges in cast aluminium enveloping both sides of the profiles.

REGISTERED DESIGN

THE BEST STEP-TO-STILE ASSEMBLY ON THE MARKET thanks to the high pressure die-cast aluminium anti-rotation end caps on the steps 1.

LARGE AND STURDY ALUMINIUM PLATFORM IN CAST ALUMINIUM 300 x 290 x 250 mm.

SAFE !

Lacquered aluminium.

REINFORCED RUNG ON THE REAR SECTION.

DEEP NON-SLIP STEPS 85 mm.

THE BEST STEP-TO-STILE ASSEMBLY ON THE MARKET

Deep non-slip steps 85 mm.

1. Platform included

2. Maximum access height provided for information purposes only

** Equipped with safety straps from 7 steps

TESTED TO 300 KG

Tested carried out in working conditions, the 4 legs resting on a concrete floor with a load of 300 kg applied to the platform.

MAXIMUM LOADING CAPACITY 150 KG.
**MP // LACQUERED ALUMINIUM WITH CRIMPED STEPS**

**REGISTERED DESIGN**

- **ULTRA RESISTANT**!
- **TOOL TRAY** up to 50 KG

- Wide format: 285 x 170 mm
- Large compartment
- Screw-on holder (Ø 50 mm)
- Steel bucket hook
- Customizable thanks to the patented Lock-in system

**SECURED**!

- The best step-to-stile assembly on the market thanks to the high-pressure die-cast aluminium anti-rotation reinforcements on the steps: maximum stability and durability.

**GREAT ROBUSTNESS**

- Large profile size at the front and the rear.

**REINFORCED CAST ALUMINIUM HINGES**.

- They embrace front and rear profiles providing exceptional strength.

**HIGHLY SECURE**!

- Wide non-slip shoes screwed to the legs for easy replacement.
- Large support surface and maximum durability due to their shape.

**RETRACTABLE STILE EXTENSION FOR MP**

- **COMPATIBLE WITH 3, 4, 5 AND 6 STEPS**.
- **HEIGHT ADJUSTMENT OF THE REAR SECTION** easy, tool-less, compensation up to 17 cm (10 possible positions*).
- **INDEPENDANT ADJUSTMENT** of the left or right stile

**FOR INTENSIVE USE**

**LARGE AND SOLID ALUMINIUM PLATFORM**

- 300 x 290 x 250 mm.

**TEST IN LABORATORY ACCORDING TO INTERNAL SPECIFICATIONS**

EN 131 STANDARD

**COMPLIANT WITH 5-YEAR WARRANTY**

SWING PRO protects from low voltage electrical currents. It complies the dielectrical test made according to EN 131 standard which checks that the product may be used when the voltage lies under 1000 volts a.c. and 1500 volts d.c. The load limit of 260 kg (obtained without deformation of the product according to test 5.8 of EN 131 standard) should not be confused with the load capacity of 150 kg which the user must not exceed. Non-contractual photos.

**Low Tablet**
with storage compartments. Capable of holding a tank of up to 15L and 25 kg max (steel or plastic).

**Easy to Move in Open or Closed Position**
thanks to Ø 100 mm non-marking wheels.

**Wide, Non-Slip 80 mm Steps.**
For ultra-comfortable access.

**Non-Slip Platform**
0.40 x 0.50m.

**Easy and Comfortable Access**
Patented self-closing pantograph system for 360° operator protection.

**Can be accessorised!**
thanks to its tool holder tablet with a slot and equipped with a patented clip system.

**Locking and Unlocking Button**
simple and easy. Patented system.

MASTERGUARD // FIXED HEIGHT WITH STABILIZERS

**Quick and Easy Installation in Two Movements.**

- **Non-Slip Platform:** 0.40 x 0.50m
- **Non-Slip 60mm Steps:** Mechanically linked to the profile by crimping for unparalleled rigidity.

**Central Features:**

- **Easy and Comfortable Access:** Patented self-closing pantograph system for 360° operator protection.
- **Automatic Adaptation to All Types of Environments:** Folds completely along the prop for transport or working in confined spaces.
- **Stabilizers with Millimetric Adjustment.**
- **Low Tablet** with storage compartments. Capable of holding a tank of up to 15L and 25 kg max (steel or plastic).
- **Easiness to Move:** thanks to its handle.
- **Easy to Move in Open or Closed Position:** thanks to ø 150 mm non-marking wheels.
- **Tools and Materials at Your Fingertips:** High capacity tool shelf with slots and two integrated hooks. Can be accessorised with the patented Lock In System.
- **Non-Slip Platform 0.40 x 0.50m:**
- **Can be Accessorised!** thanks to its tool holder tablet with a slot and equipped with a patented clip system.
- **Stabilizers with Millimetric Adjustment.**
- **Easy to Move:** thanks to its handle.
- **Automatic Adaptation to All Types of Environments:** Folds completely along the prop for transport or working in confined spaces.

MOBILE INDIVIDUAL PLATFORMS

STEPPER // WORKING PLATFORMS MUSCULOSKELETAL DISORDERS*

WORK EQUIPMENT ADAPTED TO ACCESS TO SHELVES WITHOUT RISK NOR EFFORT. DESIGNED WITH CRAMIF (HEALTH INSURANCE FUND)

EXPRESS INSTALLATION
The stepper opens in a single movement. Protection elements (safety rails and chains) are set up very quickly.

NON SLIP PLATFORM
0.60 x 0.50 m.

ACCESS BY NON-SLIP STEP OF 100 MM DEEP.

MAXIMUM LOADING CAPACITY OF 150 KG

INCOMPARABLE ERGONOMY
Large tool tray carrier package 447x200 mm which doesn’t interfere with the front access to the shelf. It is located at an ideal height for handling without effort.

Maximum loading capacity of the tray: 15kg
Perfect stability without stabilizers.

GOOD GRIP ON DAMAGED OR IMPERFECT FLOORS
Additional comfort for the user thanks to an augmented lateral stability (Stepper 2).

WIDE NON-SLIP FEET

4 WHEELS Ø 50 MM
blocked in working position and leave no trace

EASY MOVE INTO THE SHELVES
The user drives the product with one single hand thanks to 4 swivel castors. Outer width 0.73m, easily passes through the shelves.

A STAINLESS STEEL VERSION IS ALSO AVAILABLE
(especially designed for food handling/sterile environment)

STEPLADDERS
TRESTLE

X-O // MULTIPURPOSE

• COMFORTABLE!
  Maximum durability of the bi-material hinges (steel and polyamide glass fiber reinforced).

• COMFORTABLE!
  Access by wide non-slip steps (244 x 366 mm).

• STABLE!
  Wide non-slip feet.

• ROBUST!
  Aluminium profiles designed to last on every type of professional building sites.

SAFE PLATFORM RAILING WITH A HEIGHT OF 440 MM.

PRODUCTS

Video of the product’s use available on www.centaure.fr or on YouTube.
Fixed access ladders, or caged ladders, are permanent ladders intended to secure access to the outside or inside of a structure (roofs, tanks, silos) or to machinery.
Made with standard components, they are adapted for buildings and installations of all heights.
Their design is based on ease of installation, maintenance and strict compliance with current standards, making these ladders high-performance solutions.

- Aluminium alloy structure offering an excellent strength to weight ratio and anti-corrosion guarantee.
- Easy assembly.
- Quick and easy installation: few components and fastenings, and requiring no specific skills.

Centaure caged ladders comply with European standard according to the intended use.

#### On demand side rest platform with guard rails
B - SIDE EXITS

- FOR A LEFT OR RIGHT SIDE EXIT FROM THE SAFETY CAGE:
  - Side exit are compound by 1200 mm. cage (3 vertical bars and 2 specific hoops)
  - Tubular grab bar 40 x 40 mm
  High exit gate required (code 255.953 supplied separately)

C - HIGH EXIT GATE

- FRONT EXIT WITH PARAPET STEP OVER LEADING DOWN TO LANDING AREA.
- TWO FASTENING POINTS: RAIL CONNECTOR ON LADDERS AND FASTENINGS ON STILES.
- NON-SLIP GRATING LANDING PLATFORM.
- DIFFERENT LENGTH OF PLATFORM AVAILABLE.

LANDING PLATFORM:
- Platform item code 255.950
- Front exit with cage required - item code 255.900
- Exit without cage required - item code 255.955
- Two pairs of adjustable lugs.

D - EXITS FOR PARAPET PLATFORM

- FOR A LEFT OR RIGHT SIDE EXIT FROM THE SAFETY CAGE:
  - Side exit are compound by 1200 mm. cage (3 vertical bars and 2 specific hoops)
  - Tubular grab bar 40 x 40 mm
  High exit gate required (code 255.953 supplied separately)

2 - FIXED LADDERS

4 STANDARD LENGTHS

- PLAN TO PUT A PAIR OF RAIL CONNECTORS FOR EACH LADDER CONNECTION

- THE BASIC LADDER (LOWER ONE) HAS TO BE ADJUSTED IN LENGTH.
  SPACING BEAM : 400 MM.
  ALUMINIUM NON-SLIP RUNGS 28 X 25,5 MM.
  DISTANCE BETWEEN RUNGS : 280 MM.
  HIGH-PERFORMANCE RUNG-TO-STILE CONNECTION: TRIPLE CRIMPING & FLUTING.

3 - BRACKETS

- GALVANIZED STEEL, ULTRA RESISTANT.
- ATTACHED TO THE STILES OF THE LADDER.
- ATTACHED TO THE STILES WITH BRACKETS (SOLD BY PAIRS)

- SHORT FASTENING LUG FOR ATTACHING TO THE GROUND OR A WALL.
- REINFORCED ADJUSTABLE FASTENING LUGS (OR BRACKETS) TO AVOID OBSTACLES.

- MOUNTING PLATE IN STEEL WHICH ENABLES THE ANCHORING FROM THE OUTSIDE ON A STEEL SIDING.

STANDARD CLOSEUP

- The minimum space between the ladder and the surface on which it will be fixed is 200mm. /150mm. is tolerable in case of temporary obstacles.

4 - CAGES

- CAGES ARE REQUIRED TO ACCESS OVER 3 M.
- CAGES CAN BEGIN AT 2.2 M FROM THE GROUND.
- SOLD BY METRE.
- COMPOSED OF 5 UPRIGHTS AND 1 HOOP EVERY 1.5M + FASTENINGS.
- FIXING WITH BRACKETS TO THE LADDER.

*Available also in steel and stainless steel on request.
5 - OFFSET LADDERS AND SAFE REST PLATFORM

- **COMPLYING WITH STANDARDS, OFFSET LADDERS ARE REQUIRED FOR ACCESSING HEIGHTS OVER 8 M (BUILDINGS) OR 10 M (MACHINERY).**
- **OFFSET LADDERS ALLOW TO CREATE A SAFE REST PLATFORM AND ARE TO BE PLACED EVERY 6 M.**
- **CAN BE PLACED ON THE RIGHT OR THE LEFT SIDES.**

**PLATFORM FOR OFFSET LADDERS**
- 8 uprights (Ht 2300 mm).
- 2 triple hoops.
- 1 double hoop of 1150 mm.
- perforated embossed sheet metal, swivels sideways.

**RETRACTABLE REST PLATFORM**
- PERFORATED EMBOSSED SHEET METAL, SWIVELS SIDEWAYS.

**STANDARD CLOSEUP**
- Use a retractable platform if it is not possible to offset ladders due to obstacles (ducts, pipes...)

**INFORMATION REQUIRED FOR CALCULATIONS**
- **THE TOTAL HEIGHT TO BE NEGOCIATED**
  Complying with standards, offset ladders are required for accessing heights over 8m for buildings or 10m for machinery.
- **THE TYPE OF MATERIAL OF THE WALL OF THE BUILDING OR MACHINERY**
  (concrete, metal structure, stainless steel, wood...) It helps to determine the most adapted fastening method.
- **IF INTERMEDIATE EXITS ARE REQUIRED IN THE MIDDLE OF THE CAGE**
  Please, indicate at which height.
- **DESIRED METHOD OF EXIT**
  (in front of the ladder, on the side, with a parapet step over,...) In order to provide an adapted type of landing surface for the ladder.

6 - ACCESS PREVENTION

- **ACCESS TO DANGEROUS AREAS CAN BE PREVENTED BY USING AN ANTI-INTRUSION DEVICE.**
- **THE TYPE OF THE ACCESS PREVENTION DEVICE DEPENDS ON THE RISKS AND SURROUNDINGS.**

**ACCESS PREVENTION**
- **X-SHAPE**
  GALVANIZED STEEL BARRIER ATTACHED TO THE FIRST HOOP OF THE CAGE
- **RETRACTABLE SLIDING LADDER SET**

**SAFETY TRAPDOOR**
- PERFORATED EMBOSSED SHEET METAL ANTI-INTRUSION COVER FIXED TO THE LADDER.

*Also available in stainless steel and steel

Centaure Administration Sales Department is at your disposal to quote you the most adapted solution to your building or your machinery.
ACCESS TO DANGEROUS AREAS CAN BE PREVENTED BY USING AN ANTI-INTRUSION DEVICE.

THE TYPE OF THE ACCESS PREVENTION DEVICE DEPENDS ON THE RISKS AND SURROUNDINGS.

- **HOOK-IN PLATFORM**
  - Can be used outside or inside the ladder
  - Depth: 24 cm
  - Width: 25,5 cm
  - Code: 380001

- **TELESCOPIC LADDER STAND-OFF**
  - To keep the ladder away from the wall and work in gutters
  - 3 stand-off positions for the ladder
  - Removal and included tool bag
  - Suits to all ladders with a distance between rungs of 250 to 300 mm
  - Code: 380187

- **TUBE + FOOT FOR TELESCOPIC LADDER STAND-OFF**
  - Code: 380189

- **BAG + 2 HOOKS FOR TELESCOPIC LADDER STAND-OFF**
  - Code: 380288

**SPARE PARTS & ACCESSORIES**

**FOR LADDERS**

- **ROOF HOOK**
  - Easy and quick installation on the roof
  - For all models with 280mm spacing between rungs
  - Code: 380119

- **ADJUSTABLE STILE EXTENSION**
  - For level compensation
  - For single ladder only (maximum length 3,50 m)
  - Code: 380003

- **HOOK Ø 30 MM**
  - In cast aluminium (Maximum profile thickness 22,5 mm)
  - Suitable on single ladders and CM2.
  - Code: 380105

- **HOOKS Ø 50 MM**
  - In cast aluminium (Maximum profile thickness 22,5 mm)
  - Suitable on single ladders and CM2.
  - Code: 380106

- **STEEL HOOKS SA**
  - For single steel ladder
  - Code: 380467

- **LADDER HOLDER**
  - In white zinc-plated steel
  - Made to hold the ladders equipped with hooks
  - Code: 380007

- **WALL BRACKET**
  - Anti-theft system (delivered without the locker)
  - Code: 380004

- **WALL SKIDS**
  - Code: 380233

**FOR STEPLADDERS**

- **RETRACTABLE STILE EXTENSION FOR MP**
  - Compatible with 3, 4, 5 and 6 steps
  - Height adjustment of the rear section
  - Easy
  - Tool-less
  - Compensation up to 17 cm (10 possible positions)
  - Independent adjustment of the left or right stile
  - Code: 380610
  - INCLUDES 2 STILE EXTENSIONS

- **FOR STEPLADDERS MP AND EXPERT 54**
  - Adaptable handrails
  - For MP/EXPERT 54 from 7 steps
  - Assembly possible right or left side
  - Length = 1,24 m
  - Code: 380188

- **FOR STEPLADDERS MP, SWING PRO AND PLATFORMS MASTERGUARD/MASTERSCOP**
  - Paint cup
  - Utility bucket
  - Job caddy
  - Code: 382200
  - Code: 382201
  - Code: 382202

**FOR SCAFFOLDING**

- **TOOL’S UP**
  - Tool tray adaptable to all scaffolding equipped with guard rails that have a length from 51 to 65cm
  - Code: 380493

**ALUMINIUM STRAIGHTEDGES**
